## MINIMUM OF WORKING TIME AND MAXIMUM OF TIME SAVING

### Feedo feed belt - The new cost effective choice for your cattle barn from SCHAUER Agrotronic

Time is money, leisure is gold. This applies to all dairy and cattle farms, large or small. The new Feedo feed belt has been developed to provide the supply of feed all-day at low cost with minimal labor requirements.

With this new and inexpensive mechanization for cattle feeding, the farmer saves a lot of time.

The narrow feed alley allows to get more space for the animals inside existing barns renovated. The Feedo feed belt can be filled either with an indoor crane, a stationary mixer or with a loading wagon or mobile feed mixer.

The feed belt is available individually from 60 to 160 cm width, tailored to your farm. A frequency controller enables you to adjust the speed at your preferred level.

The radio remote control enables convenient operation during filling.

Feedo feed belt will help you to treat yourself to a better quality of life for little money.

## COST EFFECTIVE & ALL DAY FEED SUPPLY FOR YOUR CATTLE

### Feedo feed belt for an efficient and cost effective cattle feeding

## THE EFFICIENT AND COST EFFECTIVE ALL DAY FEED SUPPLY FOR YOUR CATTLE

# THE PERFECT SOLUTION FOR YOUR ANIMALS

## AN INNOVATIVE COORDINATED OVERALL SYSTEM!

### ▶ FARO feed delivery robot

Simply save time and money with the newly designed SCHAUER FARO feed delivery robot!

FARO combines all the essential functions of the available products on the market and has much more to offer with its optional concentrate feeder.

- Increase in feed intake and increase in milk yield
- Reduces working time and energy consumption whilst increasing yield
- 24 h a day access to fresh food

### ▶ ENRO manure removal robot with PC route planning and smart operation

For optimal hygiene and health in your cattle barn:

- Highest functional reliability due to multi-sensor technology
- PC route planning for easy installation and route optimization
- With a height of only 41 cm and a weight of 450 kg, the compact design makes the ENRO the star of the manure removal robots on the market

### ▶ Strohmatic littering system

For dissolving, shredding, dedusting and automatic spreading of straw in demanded quantities:

- System proven over years
- For animal welfare
- Saves more than 50 % of straw and working time
